Date of birth: 21/10/2000

Mail: trungkienks8@gmail.com

Address: 79/47 Bui Quang La str, Ward 12, Go Vap district, Ho Chi Minh city

My Portfolio: <https://my-cv-theta.vercel.app/>

My GitHub: <https://github.com/KieenVux?tab=repositories>

PERSONAL GOAL

A software engineer with hands-on experience in all levels of testing, including performance, functional, integration, system, and user acceptance. In the future i aim at being a business analysis

AREAS OF EXPERTISE

- Hands-on SQL, MySQL experience
- Web API experience
- GitHub, GitLab, Docker, Deploy in server, CICD by Github, AWS, Microservice, GraphQL
- Language: Java, Php, Go, JS, TS
- Orther: UI/UX

EDUCATION HISTORY

FPT UNIVERSITY

- Study Bachelor of Software Engineering, 10/2018 -> 10/2022
- Member, Video Game Society
- Member, Student IT Helpdesk
- Member, Footbal Club

OTHER SKILLS

- The ability to analyze complex requirement of client
- Can analyze, design and implement database structures
- Detail oriented
- Good problem solver

WORK EXPERIENCE

4/2020 -> 6/2022:

PASONA TECH | 12/2021 - 3/2022

CROSSING LANDING PAGE

- Full-stack using Php, JQuery
- Responsibility: Analysis requirement, Desgin database, Procedure of making a web application or mobile app

Teqnological | 12/2021 - 6/2022

Eazy Trade

- Project description: Platform trading for company
- Technologies used:
 - Go, GraphQL Api
- Responsibility:
 - Build project form scratch
 - Working with team lead to find solutions
- Skill Learn: Analysis requirement, Desgin database, Procedure of making a mobile app

SOFTWARE ENGINEER

VŨ TRUNG KIÊN

WORK EXPERIENCE

Lucents Technology | 6/2022 – 5/2024

Merritrade: 6/2022 – 5/2024

Link project: <https://merritrade.com/>

- Project description: Platform trading, collaborate with third party to organize some trading tournament
- Technologies used:
 - ReactJs
 - NX for monorepo management
 - NestJS, ExpressJS
 - Socket.io
 - RESTful & GraphQL API
 - PostgreSQL, Redis
- Responsibility: Fullstack (Backend: 70%, Frontend 20%, Devops: 10%)
 - Implemented UI based on design specifications and integrated with backend APIs.
 - Manage and maintain the flow for placing, closing orders and close orders when tournaments end.
 - Manage banned users
 - Automate email notifications for upcoming and ending tournaments for users
 - Manage notifications
 - Fixed ranking boards when tournaments ended
 - Export order history files, many ranking boards
 - Manage articles
 - Handle develop project by AWS(EC2, S3, RDS, Codebuild, CodePipeline, ECR, R53), Github action, Docker

Sales Network: 1/2023 – 5/2024

- Project description: smart HRM system that implement payroll solution
- Technologies used:
 - ReactJs
 - NX for monorepo management
 - NestJS, ExpressJS
 - Socket.io
 - RESTful & GraphQL API
 - PostgreSQL
- Responsibility: Main Backend
 - Implemented UI based on design specifications and integrated with backend APIs.
 - Refactored the money transfer flow, reducing transfer errors by approximately 80%
 - Handled sales team requests (such as department and team changes, complaints, and payroll exports)
 - Refactored the bonus and penalty system
 - Managed internal notifications
 - Working with team lead to find solutions
 - Handle develop project by AWS(EC2, S3, RDS, Codebuild, CodePipeline, ECR, R53), Github action, Docker

The Brokers: 1/2023 – 12/2023

Link project: <https://thebrokers.com/>

- Project description: Forex brokers information lookup platform
- Technologies used:
 - ReactJs
 - Strapi
 - Mongo
 - RESTful
- Responsibility:
 - Maintain ,optimize application performance
 - Develop new features (some CRUD)
 - Handle develop project by AWS(EC2, S3, Codebuild, CodePipeline, ECR, R53), Github action, Docker

Infofinance: 12/2022 – 5/2024

Link project: <https://infofinance.com/>

- Project description: A third-party entity that resolves complaints for investors and updates the latest financial news.
- Technologies used:
 - ReactJs
 - Strapi, NestJS
 - Mongo
 - RESTful
- Responsibility:(Backend: 70%, Frontend 20%, Devops: 10%)
 - Design UI, Display data
 - Build project from scratch
 - User: Create complaints, participate in events, read news, view reviews of trading platforms.
 - Dashboard: Handle complaints by team, create and edit events, create and edit teams, create, edit, and display news.
 - Handle develop project by AWS(EC2, S3, Codebuild, CodePipeline, ECR, R53), Github action, Docker, Cognito, Amplify

VŨ TRUNG KIÊN

Hamanoya-浜の家 | 9/2025 – present

LuanaOluOlu: 9/2025 – 12/2025

- **Project description:**
 - Shop dessert online
- **Technologies used:**
 - Html
 - NestJS
 - PostgreSQL
 - RESTful
- **Responsibility:**
 - Fullstack Developer: (Strong in Backend)
 - Build from scratch
 - Implemented CRUD functionalities for product, categories, users, orders, login by LINE, send Message by LINE
 - Handle develop project by AWS(EC2, S3, Codebuild, CodePipeline, ECR, R53), Github action, Docker

Internal App: 12/2025 – present

- **Project description:**
 - An internal application designed to distribute news, notices, policies, manuals, as well as collect feedback from employees
- **Technologies used:**
 - Svelte
 - NestJS
 - MySQL
 - RESTful
- **Responsibility:**
 - Fullstack Developer: (Strong in Backend)
 - Managed the end-to-end development process, covering requirements definition, system architecture design
 - Designed the database schema using MySQL and built backend services with NestJS and RESTful APIs.
 - Developed the administration panel allowing managers to seamlessly publish and manage news, notices, policies, manuals, opinions.
 - Implemented a UI for employees to submit opinions and view news, notices, policies, manuals.

WORK EXPERIENCE

Finviet | 6/2024 – 6/2025

ECODMS: 6/2024 – 6/2025

- **Project description:**
 - A Distribution Management System (DMS) to streamline product distribution, inventory tracking, and order fulfillment across multiple warehouses and sales channels.
- **Technologies used:**
 - NestJS
 - Socket.io
 - RESTful
 - Mongo, Redis
 - Microservice
- **Responsibility:**
 - **Backend Developer:**
 - Maintain the flow for sales checkin
 - Maintain flow count kpi for day, week, month for personal and team
 - Export order file route assigned
 - View list store in future
 - Fix Bug:
 - Store detail information is wrong and some parts are missing.
 - The route was successfully reassigned after the distributor was changed.

Lending: 1/2025 – 6/2025

- **Project description:**
 - A comprehensive platform for managing the entire loan lifecycle, from borrower verification to disbursement and repayment.
- **Technologies used:**
 - NestJS
 - RESTful
 - PostgreSQL
 - Microservice
- **Responsibility:**
 - Backend Developer:
 - Start from scratch
 - Setup Database with senior dev and teamlead
 - Import and export users into the whitelist only if they are eligible for lending.
 - Mapping documents to loan products
 - Mapping fees to loan products
 - Map suppliers and their services to loan products.
 - Integrate the in-house payment gateways into the lending application.
